Standards Index

			Steel	Stainless steel	Non-ferrous
DIN 1 B		Taper pin, turned Conische pen, gedraaid / Goupille conique	9-11	9-12	-
DIN 7		Parallel pin (dowel pin) Cilindrische pen / Goupille cylindrique	9-2	9-3	-
DIN 84		Slotted cheese head screw Cilinderschroef met zaaggleuf / Vis à tête cylindrique fendue	6-6	6-11	6-10
DIN ≈84		Slotted cheese head screw Cilinderschroef met zaaggleuf / Vis à tête cylindrique fendue	-	-	6-13
DIN 85		Slotted pan head screw Pancilinderschroef met zaaggleuf / Vis à tête cylindrique fendue	6-24	6-26	6-25
DIN ≈85		Slotted pan head screw Pancilinderschroef met zaaggleuf / Vis à tête cylindrique fendue	-	-	6-27
DIN 93		Tab washer with long tab Lipborgplaat met één lip / Frein d'écrou droit à aileron	7-124	7-125	-
DIN 94		Split pin (cotter pin) Splitpen / Goupille cylindrique fendue	9-46	9-48	9-49
DIN 95		Slotted raised countersunk head wood screw Bolverzonken houtschroef met zaaggleuf / Vis à bois à tête fraisée bombée fendue	-	6-229	6-227
DIN 96		Slotted round head wood screw Bolkop houtschroef met zaaggleuf / Vis à bois à tête ronde fendue	6-219	6-220	6-220
DIN 97		Slotted countersunk (flat) head wood screw Verzonken houtschroef met zaaggleuf / Vis à bois à tête fraisée fendue	6-223	6-224	6-224
DIN 125-1A		Plain washer Vlakke sluitring / Rondelle plate	7-9	7-11	7-11
DIN 125-1B		Plain washer, chamfered Vlakke sluitring met afschuining / Rondelle plate, chanfreinée	7-17	7-18	7-18
DIN 126		Plain washer Vlakke sluitring / Rondelle plate	7-4	-	-
DIN 127 A		Spring lock washer with tang ends Veerring met opgebogen einden / Rondelle élastique à embout	7-66	-	-
DIN 127 B		Spring lock washer with square ends Veerring met vlakke einden / Rondelle élastique à extrémités carrées	7-67	7-69	7-70

			Steel	Stainless steel	Non-ferrous
DIN 128 A		Curved spring lock washer Gewelfde borgveerring / Rondelle élastique cintrée	7-75	7-75	7-76
DIN 128 B		Wave spring lock washer Golfveerring / Rondelle élastique ondulée	7-76	-	-
DIN 137 A		Curved spring washer Gewelfde veerring / Rondelle élastique cintrée	7-77	7-78	-
DIN 137 B		Wave spring washer Gegolfde veerring / Rondelle élastique ondulée	7-78	7-79	-
DIN 186 B		T-head bolt with square neck Hamerkopbout met vierkante nek / Vis à tête rectangulaire à collet carré	5-3	5-4	-
DIN 258		Taper pin with external thread and constant taper length Conische pen met buitendraad en vaste conuslengte / Goupille conique à filetage extérieur et longueur conique constante	9-13	-	-
DIN 261/555		T-head bolt with nut Hamerkopbout met moer / Vis à tête rectangulaire à angles abattus, avec écrou	5-4	-	-
DIN 313		Wing nut with rounded wings Vleugelmoer ronde vleugelvorm / Écrou à oreilles arrondies	3-180	-	3-180
DIN 315		Wing nut with rounded wings Vleugelmoer ronde vleugelvorm / Écrou à oreilles arrondies	3-118	3-119	3-119
DIN ≈315		Wing nut, edged (American) type Vleugelmoer licht (Amerikaans model) / Écrou à oreilles modèle léger (Américain)	3-120	3-120	-
DIN 316		Wing screw rounded wings Vleugelschroef ronde vleugelvorm / Vis à oreilles arrondies	6-292	6-293	6-293
DIN ≈319 C		Ball knob, type C Kogelknop type C / Bouton sphérique type C	-	-	12-72
DIN ≈319 E		Ball knob, type E Kogelknop type E / Bouton sphérique type E	-	-	12-72
DIN ≈319 M		Ball knob with conical hole, type M Kogelknop met conisch gat, type M / Bouton sphérique avec trou conique, type M	-	-	12-73
DIN 388-1C		Handwheel with ripple ring Handwiel met geribbelde ring / Roue à main avec volant ondulé	-	-	12-95
DIN 404		Slotted capstan screw Kruisgatschroef met zaaggleuf / Vis à tête cylindrique fendue avec perçage en croix	6-56	6-57	-

			Steel	Stainless steel	Non-ferrous
DIN 417		Slotted set screw with long dog point Stelschroef met tap / Vis sans tête fendue à bout téton	6-266	6-266	-
DIN 427		Slotted set screw Stelschroef met zaaggleuf / Vis sans tête fendue	6-264	6-265	-
DIN 431 A		Hexagon pipe nut Zeskantmoer pijpschroefdraad / Écrou hexagonal filetage gaz	-	3-181	-
DIN 431 B		Hexagon pipe nut Zeskantmoer pijpschroefdraad / Écrou hexagonal filetage gaz	3-182	-	3-182
DIN 432		External tab washer Nokborgplaat met buitennok / Rondelle frein d'écrou à ergot extérieur	7-119	7-119	-
DIN 433-1		Plain washer for cheese head screws Vlakke sluitring voor cilinderschroeven / Rondelle plate pour vis à tête cylindrique	7-21	7-21	7-21
DIN 434		Square taper washer 8% for U-sections Hellingplaat 8% voor U-profiel / Plaquette oblique 8% pour profilés en U	7-44	7-44	-
DIN 435		Square taper washer 14% for I-sections Hellingplaat 14% voor I-profiel / Plaquette oblique 14% pour profilés en I	7-45	7-45	-
DIN 436		Square washer especially for wood constructions Vierkante sluitplaat voor houtconstructie / Rondelle carrée spécialement pour les constructions en bois	7-38	7-39	-
DIN 438		Slotted set screw with cup point Stelschroef met zaaggleuf en kratereind / Vis sans tête fendue à bout cuvette	6-263	6-263	-
DIN 439 2		Hexagon thin nut Lage zeskantmoer / Écrou hexagonal bas	3-37	3-37	3-37
DIN 440 R		Plain washer, especially for wood constructions Vlakke sluitring voor houtconstructie / Rondelle plate pour les constructions en bois	7-40	7-40	-
DIN 440 V		Plain washer with square hole, especially for timber constructions Vlakke sluitring met vierkant gat, voor houtconstructie / Rondelle plate à trou carré, pour les constructions en bois	7-41	7-41	-
DIN ≈443		Sealing push-in cap, cylindrical Afdichtende inpersdop, cilindrisch / Capuchon de fermeture, cylindrique	12-43	-	-
DIN 444 B		Eye bolt Knevelschroef / Corps de boulon à oeil	5-6	5-8	5-9
DIN 444 LB		Eye bolt fully threaded Knevelschroef voldraad / Corps de boulon à oeil filetage total	5-9	-	-

		Steel	Stainless steel	Non-ferrous
DIN 462	 Internal tab washer for slotted round nuts Nokborgplaat met binnennok voor ronde gleufmoeren / Rondelle frein à ergot intérieur pour écrous ronds fendus	7-121	-	-
DIN 463	 Tab washer with long and short tab Lipborgplaat met korte en lange lip / Frein d'écrou d'équerre à aileron long et court	7-126	7-127	7-127
DIN 464	 Knurled thumb screw high type Hoge kartelschroef / Vis moletée epaulée	6-273	6-274	6-274
DIN 464 Sz	 Slotted knurled thumb screw high type Hoge kartelschroef met zaaggleuf / Vis moletée epaulée fendue	-	6-277	-
DIN 466	 Knurled nut, high type Kartelmoer hoog / Écrou moleté type haut	3-122	3-122	3-123
DIN 467	 Knurled nut, low type Kartelmoer laag / Écrou moleté type bas	3-123	3-124	3-124
DIN 470	 Sealing washer Expansieplaat / Rondelle de fermeture	12-44	-	-
DIN 471	 Retaining ring for shafts - normal type Zekeringsring voor assen, normaal / Circlip pour arbres - type normal	7-130	7-130	-
DIN 471	 Retaining ring for shafts - heavy type Zekeringsring voor assen, zwaar / Circlip pour arbres - type lourd	7-131	-	-
DIN 472	 Retaining ring for bores - normal type Zekeringsring voor boringen, normale uitvoering / Circlip pour alésages - type normal	7-134	7-135	-
DIN 478	 Square head bolt with collar Vierkant kraagbout / Vis à tête carrée à embase cylindrique	1-122	-	-
DIN 479	 Square head bolt with short dog point Vierkantbout met korte tap / Vis à tête carrée à téton court	1-122	-	-
DIN 480	 Square head bolt with collar and short rounded dog point Vierkant kraagbout met bolle tap / Vis à tête carrée à embase plate cylindrique à téton court bombée	1-123	-	-
DIN 508	 Nut for T-slots Moer voor T-gleuf / Écrou pour les rainures en T	10-82	-	-
DIN 525	 Welding stud with hexagon nut Aanlaseind met zeskantmoer / Tige à souder avec écrou	4-83	-	-
DIN 529 A	 Masonry bolt type A Fabory Fundatie-eind type A, Fabory / Tige de scellement type A, Fabory	8-97	-	-

			Steel	Stainless steel	Non-ferrous
DIN 529 C		Masonry boltset Fabory Fundatiebout+moer, Fabory / Boulon et écrou de scellement, Fabory	8-98	-	-
DIN 529 E		Masonry bolt type E Fabory Fundatie-eind type E, Fabory / Tige de scellement type E, Fabory	8-99	-	-
DIN 546		Slotted round nut Ronde moer met zaaggleuf / Écrou cylindrique à fente	3-111	3-111	3-112
DIN 551		Slotted set screw with flat point Stelschroef met zaaggleuf en afschuining / Vis sans tête fendue à bout plat	6-258	6-259	6-259
DIN 553		Slotted set screw with cone point Stelschroef met zaaggleuf en kegelpunt / Vis sans tête fendue à bout pointeau	6-261	6-262	6-261
DIN 555		Hexagon nut Zeskantmoer / Écrou hexagonal	3-30	-	-
DIN 557		Square nut Vierkantmoer / Écrou carré	3-108	3-109	-
DIN 561		Small hexagon head set screw with full dog point Zeskantbout met kleine kop en lange tap / Vis à tête hexagonale réduite et bout téton	1-118	-	-
DIN 561 Ri		Small hexagon head set screw with undercut and full dog point Zeskantbout met kleine kop, lange tap en ondersnijding / Vis à tête hexagonale réduite avec gorge et bout téton	1-119	-	-
DIN 562		Square thin nut Lage vierkantmoer / Écrou carré bas	3-110	3-110	-
DIN 564		Small hexagon head set screw with short dog point with flat cone Zeskantbout met kleine kop, korte conische tap / Vis à tête hexagonale réduite et bout téton court tronconique	1-121	-	-
DIN 564 Ri		Small hexagon head set screw with undercut and small dog point with flat cone Zeskantbout met kleine kop, korte conische tap en ondersnijding / Vis à tête hexagonale réduite avec gorge et bout téton court tronconique	1-120	-	-
DIN 571		Hexagon head wood screw Zeskant houtdraadbout / Vis à bois à tête hexagonale	6-231	6-233	-
DIN ≈571		Hexagon head wood screw Zeskant houtdraadbout / Vis à bois à tête hexagonale	-	6-233	-
DIN 580		Lifting eye bolt, CE marked Oogbout met CE markering / Vis à anneau, CE marquage	5-11	5-12	-
DIN ≈580		Lifting eye bolt, CE marked Oogbout met CE markering / Vis à anneau, CE marquage	5-56	-	-

			Steel	Stainless steel	Non-ferrous
DIN 582		Lifting eye nut, CE marked Oogmoer met CE markering / Écrou à anneau, CE marquage	5-13	5-14	-
DIN ≈582		Lifting eye nut, CE marked Oogmoer met CE markering / Écrou à anneau, CE marquage	5-57	-	-
DIN 601/555		Hexagon head bolt with hexagon nut Zeskantbout met zeskantmoer / Boulon à tête hexagonale avec écrou hexagonale	1-98	-	-
DIN 603		Carriage bolt Slotbout / Vis à tête bombée à collet carré	1-105	1-106	1-107
DIN ≈603		Carriage bolt fully threaded Slotbout voldraad / Vis à tête bombée à collet carré, filetage total	-	1-108	-
DIN 603/555		Carriage bolt with hexagon nut Slotbout met zeskantmoer / Vis à tête bombée et collet carré avec écrou hexagonal	1-102	-	-
DIN 604/555		Flat countersunk nib bolt with hexagon nut Verzonkenkop nokbout met zeskantmoer / Corps de boulon à tête fraisée à ergot avec écrou hexagonal	1-110	-	-
DIN 605/555		Flat countersunk square neck bolt with long square with hexagon nut Verzonken slotbout met hoog vierkant met zeskantmoer / Corps de boulon à tête fraisée et collet carré avec écrou hexagonal	1-111	-	-
DIN 607/555		Cup head nib bolt with hexagon nut Slotbout verzonkenkop met nok en moer / Boulon à tête ronde avec ergot	1-112	-	-
DIN ≈608		Flat countersunk square neck bolt with short square Verzonken slotbout met laag vierkant / Corps de boulon à tête fraisée à collet carré court	1-113	-	-
DIN 609		Hexagon fit bolt with long thread Zeskant pasbout met lang draadgedeelte / Corps de boulon ajustable à tête hexagonale à téton fileté long	1-84	-	-
DIN 610		Hexagon head fit bolt with short thread Zeskant bout met korte tap / Vis à tête hexagonale, à corps ajusté	1-86	-	-
DIN 653		Knurled thumb screw thin type Lage kartelschroef / Vis moletée plate	6-275	6-276	6-276
DIN 660/124		Rivet round head Bolkop klinknagel / Rivet à tête ronde	14-43	14-44	14-45
DIN 661/302		Rivet countersunk head Verzonkenkop klinknagel / Rivet à tête fraisée	14-46	14-47	14-47
DIN 662		Rivet mushroom head Lenskop klinknagel / Rivet à tête fraisée bombée	14-48	-	14-49

			Steel	Stainless steel	Non-ferrous
DIN 674		Rivet flat round head Platbolkop klinknagel / Rivet à tête bombée	14-49	-	-
DIN 703		Adjusting ring, heavy, with hex socket set screws Stelring, zware uitvoering, met binnenzeskant stelschroef met kegelpunt / Bague d'arrêt, lourde, avec vis sans tête à six pans creux à bout tronconique	7-144	-	-
DIN 705 A		Adjusting ring with set screws Stelring met stelschroeven / Bague d'arrêt avec vis sans tête	7-145	-	-
DIN ≈705A		Adjusting ring with hex socket set screws with cone point Stelring met binnenzeskant stelschroef met kegelpunt / Bague d'arrêt avec vis sans tête à six pans creux à bout tronconique	-	7-146	-
DIN ≈705A		Adjusting ring with slotted set screws Stelring met stelschroef met gleuf / Bague d'arrêt avec vis sans tête fendue	7-148	7-148	-
DIN ≈705A		Adjusting ring with hex socket set screws with cup point Stelring met binnenzeskant stelschroef met kegelpunt / Bague d'arrêt avec vis sans tête à six pans creux à bout tronconique	7-150	7-150	-
DIN 705 B		Adjusting ring with pin hole Stelring met gat voor pen / Bague d'arrêt avec trou pour goupille	7-151	-	-
DIN 741/555		Wire rope clip Staaldraadklem / Serre-câble à étrier	5-27	-	-
DIN 787		Bolt for T-slots Bout voor T-gleuf / Boulon pour rainures en T	10-76	-	-
DIN 835		Stud metal end ≈ 2d Tapeind inschroeflengte ≈ 2d / Goujon longueur d'implantation ≈ 2d	4-80	4-81	-
DIN 906		Hexagon socket screw plug Binnenzeskant afdichtplug / Bouchon fileté à six pans creux	2-82	2-83	2-83
DIN 908		Hexagon socket screw plug with collar Binnenzeskant afdichtplug met kraag / Bouchon fileté à collerette et à six pans creux	2-86	2-86	2-88
DIN 909		Hexagon head screw plug Zeskant afdichtplug / Bouchon fileté à tête hexagonale	2-89	-	-
DIN 910		Hexagon head screw plug with collar Zeskant afdichtplug met kraag / Bouchon fileté à tête hexagonale et à collerette	2-92	2-93	2-93
DIN 912		Hexagon socket head cap screw Cilinderschroef met binnenzeskant / Vis à tête cylindrique à six pans creux	2-15	2-19	2-24
DIN ≈912		Hexagon socket head cap screw fully threaded Cilinderschroef met binnenzeskant voldraad / Vis à tête cylindrique à six pans creux filetage total	2-28	2-28	2-29

			Steel	Stainless steel	Non-ferrous
DIN 913		Hexagon socket set screw with flat point Stelschroef met binnenzeskant en afschuining / Vis sans tête à six pans creux à bout plat	2-64	2-66	-
DIN ≈913		Hexagon socket set screw with flat point Stelschroef met binnenzeskant en afschuining / Vis sans tête à six pans creux à bout plat	2-68	-	-
DIN 914		Hexagon socket set screw with cone point Stelschroef met binnenzeskant en kegelpunt / Vis sans tête à six pans creux à bout tronconique	2-70	2-71	-
DIN 915		Hexagon socket set screw with dog point Stelschroef met binnenzeskant en tap / Vis sans tête à six pans creux à téton	2-73	2-75	-
DIN 916		Hexagon socket set screw with cup point Stelschroef met binnenzeskant en kratereind / Vis sans tête à six pans creux à bout cuvette	2-77	2-79	-
DIN ≈916		Hexagon socket set screw with cup point Stelschroef met binnenzeskant en kratereind / Vis sans tête à six pans creux à bout cuvette	2-81	-	-
DIN ≈916		Hexagon socket set screw with knurled cup point Stelschroef met binnenzeskant en gekarteld kratereind / Vis sans tête à six pans creux à bout cuvette nervurée	2-80	-	-
DIN 917		Hexagon cap nut, low type Zeskant dopmoer laag / Écrou hexagonal borgne bas	3-105	3-106	3-106
DIN 920		Slotted pan head screw small head Pancilinderschroef met zaaggleuf en kleine kop / Vis à tête cylindrique réduite fendue	6-54	6-54	-
DIN 921		Slotted pan head screw large head Pancilinderschroef met zaaggleuf en grote kop / Vis à tête ronde large fendue	6-55	6-56	-
DIN 923		Slotted pan head screw with shoulder Pancilinderschroef met zaaggleuf en borst / Vis à tête cylindrique fendue à tige ajustable	6-284	6-285	-
DIN 927		Slotted shoulder screw Passchroef met zaaggleuf / Vis épaulée à tête fendue	6-294	-	-
DIN 928		Square weld nut Vierkantlasmoer / Écrou carré à souder	3-126	3-126	-
DIN 929		Hexagon weld nut Zeskantlasmoer / Écrou hexagonal à souder	3-125	3-125	-
DIN 931		Hexagon head bolt Zeskantbout / Boulon à tête hexagonale	1-6	1-20	1-27
DIN ≈931		Hexagon head bolt Zeskantbout / Boulon à tête hexagonale	-	-	1-27

			Steel	Stainless steel	Non-ferrous
DIN 933		Hexagon head screw Zeskant tapbout / Vis à tête hexagonale filetage total	1-35	1-48	1-59
DIN ≈933		Hexagon head screw Zeskant tapbout / Vis à tête hexagonale filetage total	1-62	1-63	1-60
DIN ≈933		Hexagon head screw Zeskant tapbout / Vis à tête hexagonale, filetage total	-	1-61	-
DIN ≈933		Slotted hexagon head screw Zeskant tapbout met zaaggleuf / Vis à tête hexagonale, fendue, filetage total	1-61	-	-
DIN 934		Hexagon nut Zeskantmoer / Écrou hexagonal	3-16	3-20	3-24
DIN ≈934		Hexagon nut Zeskantmoer / Écrou hexagonal	3-45	3-46	-
DIN 935-1		Hexagon slotted and castle nut Kroonmoer / Écrou hexagonal à créneaux	3-92	3-94	-
DIN 936		Hexagon thin nut Lage zeskantmoer / Écrou hexagonal bas	3-41	3-42	3-42
DIN 937		Hexagon thin slotted and castle nut (old type) Kroonmoer laag (oude type) / Écrou hexagonal à créneaux bas (ancien type)	3-96	3-97	-
DIN 938		Stud metal end ≈ 1d Tapeind inschroeflengte ≈ 1d / Goujon longueur d'implantation ≈ 1d	4-73	4-73	-
DIN 939		Stud metal end ≈ 1,25d Tapeind inschroeflengte ≈ 1,25d / Goujon longueur d'implantation ≈ 1,25d	4-75	4-78	-
DIN 950		Handwheel AL Handwiel AL / Volant AL	-	-	12-96
DIN 960		Hexagon head bolt Zeskantbout / Boulon à tête hexagonale	1-28	-	-
DIN 961		Hexagon head screw Zeskant tapbout / Vis à tête hexagonale filetage total	1-64	-	-
DIN 963 A		Slotted countersunk head screw Verzonkenkop schroef met zaaggleuf / Vis à métaux à tête fraisée fendue	6-14	6-17	6-16
DIN ≈963 A		Slotted countersunk head screw Verzonkenkop schroef met zaaggleuf / Vis à métaux à tête fraisée fendue	-	-	6-20

			Steel	Stainless steel	Non-ferrous
DIN 964 A		Slotted raised countersunk head screw Bolverzonken schroef met zaaggleuf / Vis à tête fraisée bombée fendue	6-20	6-22	6-21
DIN 965 A-H		Cross recessed countersunk head screw Verzonkenkop schroef met kruisgleuf / Vis à métaux à tête fraisée à empreinte cruciforme	6-37	6-40	-
DIN 965 A-Z		Cross recessed countersunk head screw Verzonkenkop schroef met kruisgleuf / Vis à métaux à tête fraisée à empreinte cruciforme	6-39	6-41	-
DIN ≈965 A-Z		Cross recessed countersunk head screw Verzonkenkop schroef met kruisgleuf / Vis à métaux à tête fraisée à empreinte cruciforme	-	-	6-40
DIN ≈965 A		Hexalobular countersunk head screw Verzonken schroef met T-ster / Vis à tête fraisée à six lobes internes	6-49	6-50	-
DIN 966 A-H		Cross recessed raised countersunk head screw Bolverzonken schroef met kruisgleuf / Vis à tête fraisée bombée empreinte cruciforme	6-43	6-44	-
DIN 966 A-Z		Cross recessed raised countersunk head screw Bolverzonken schroef met kruisgleuf / Vis à tête fraisée bombée empreinte cruciforme	6-44	6-45	-
DIN ≈966 A		Hexalobular raised countersunk head screw Bolverzonken metaalschroef met T-ster / Vis à métaux tête fraisée bombée six lobes internes	-	6-52	-
DIN 976-1A		Threaded rod, 1 meter Draadstang, 1 meter / Tige filetée, 1 mètres	4-9	4-10	4-14
DIN 976-1A		Threaded rod, 2 meter Draadstang, 2 meter / Tige filetée, 2 mètres	4-6	4-10	-
DIN 976-1A		Threaded rod, 3 meter Draadstang, 3 meter / Tige filetée, 3 mètres	4-6	4-10	-
DIN 976-1A		Threaded rod, various lengths Draadstang diverse lengtes / Tige filetée différentes longueurs	4-5	4-10	-
DIN 976-1B		Threaded rod, various lengths Draadstang diverse lengtes / Tige filetée différentes longueurs	4-15	-	-
DIN 979		Hexagon thin slotted and castle nut Kroonmoer laag / Écrou hexagonal à créneaux bas	3-98	3-99	-
DIN 980V		Prevailing torque type hexagon nut with non-metallic insert Zelfborgende zeskantmoer met kunststof ring / Écrou auto-freiné hexagonal avec anneau non-metallique	3-78	3-79	-
DIN ≈980V		BILOC Prevailing torque type hexagon nut, all metal BILOC Zelfborgende zeskantmoer geheel metaal / BILOC Écrou hexagonal autofreiné tout métal	3-81	3-81	-

			Steel	Stainless steel	Non-ferrous
DIN 981		Lock nut for rolling bearings Ronde moer met gleuven - antifrictielager / Écrou cylindrique à encoches	3-114	-	-
DIN 982		Prevailing torque type hexagon nut with non-metallic insert Zelfborgende zeskantmoer met kunststof ring / Écrou auto-freiné hexagonal avec anneau non-métallique	3-69	3-70	-
DIN 982		Prevailing torque type hexagon nut with non-metallic insert, high type Zelfborgende zeskantmoer met kunststof ring, hoog model / Écrou auto-freiné hexagonal haut à anneau non-métallique	3-70	-	-
DIN 983		Retaining ring with lugs for shafts Zekeringsring met nokken, voor assen / Circlip de sécurité à ergots extérieurs, pour arbres	7-137	-	-
DIN 985		Prevailing torque type hexagon nut with non-metallic insert Zelfborgende zeskantmoer met kunststof ring / Écrou auto-freiné hexagonal avec anneau non-métallique	3-62	3-64	3-65
DIN 986		Prevailing torque type hexagon domed cap nut with non-metallic insert Zelfborgende dopmoer met kunststof ring / Écrou hexagonal auto-freiné borgne avec anneau non-métallique	3-74	3-74	-
DIN 988		Shim ring Pasring (Shim) / Rondelle d'ajustage	7-58	7-59	-
DIN 1052		Plain washer, large, especially for timber constructions Vlakke sluitring met grote buitendiameter, voor houtconstructie / Rondelle plate, série large pour les constructions en bois	7-42	7-43	-
DIN 1434		Clevis pin with small head and split pin hole Gaffelpen met kleine kop en splitpengat / Axe d'articulation avec petite tête et trou pour goupille cylindrique	9-44	9-44	-
DIN 1440		Plain washer for clevis pins, medium finish Vlakke sluitring voor gaffelpennen / Rondelle plate pour axes d'articulation, finition moyenne	7-52	7-53	-
DIN 1441		Plain washer for clevis pins, product grade C Vlakke sluitring voor gaffelpennen, productklasse C / Rondelle plate pour axes d'articulation, classe de produit C	7-54	7-55	-
DIN 1444		Clevis pin with head and split pin hole Gaffelpen met kop en splitpengat / Axe d'articulation avec tête et trou pour goupille cylindrique	9-43	-	-
DIN 1470		Grooved pin, full length parallel grooved with pilot Cilindrische kerfpen met tap / Goupille cylindrique cannelée avec bout	9-16	-	-
DIN 1471		Grooved pin, full length taper grooved Conische kerfpen / Goupille conique cannelée	9-17	9-18	-
DIN 1472		Grooved pin, half length taper grooved Doorsteek kerfpen / Goupille d'ajustage cannelée	9-19	9-20	-
DIN 1473		Grooved pin, full length parallel with chamfer Cilindrische kerfpen / Goupille cylindrique cannelée	9-21	9-22	-

			Steel	Stainless steel	Non-ferrous
DIN 1474		Grooved pin, half length reverse Insteekkerfpen / Goupille cannelée embrochable	9-23	9-24	-
DIN 1475		Grooved pin, one-third length center grooved Gaffelkerfpen / Goupille cannelée bombée	9-25	9-25	-
DIN 1476		Grooved pin with round head Bolkop kerfnagel / Clou cannelé à tête ronde	9-26	9-27	9-27
DIN 1477		Grooved pin with countersunk head Verzonken kerfnagel / Clou cannelé à tête fraisée	9-29	-	-
DIN 1478		Turnbuckle, tube Spanschroefmoer, pijp / Tendeur acier tubulaire	5-14	-	-

Non-Standards Index

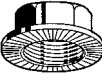

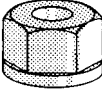

1 Bolts

		Steel	Stainless steel	Non-ferrous
 Flat countersunk wing neck bolt with hexagon nut Verzonken vleugelslotbout met zeskantmoer / Corps de boulon à tête fraisée à collet à oreilles avec écrou hexagonal		1-114	-	-
 Track shoe bolt Track shoe bout / Boulon Track shoe		1-153	-	-
 Protecting cap for hexagon bolts, screws and nuts Beschermkap voor zeskantbouten en -moeren / Capuchon de protection pour vis hexagonales et écrous hexagonaux		-	-	1-165

2 Sockets and set screws

		Steel	Stainless steel	Non-ferrous
 Self-locking hexagon socket head cap screw with flange Zelfborgende cilinderkopflensschroef met binnenzeskant / Vis de sécurité à tête cylindrique à six pans creux à embase		2-39	-	-
 Hexagon socket set screw with nylon dog point (thrust screw) Stelschroef met binnenzeskant en nylon tap (drukschroef) / Vis sans tête à six pans creux à téton en plastique (thrust screw)		2-76	-	-
 Cover for hexagon socket screw Afdekkap voor schroeven met binnenzeskant / Capuchon pour vis à tête à six pans creux		-	-	2-130

3 Nuts

	Steel	Stainless steel	Non-ferrous
 Hexagon connection nut H=3xD Zeskant verbindingsmoer H=3xD / Écrou hexagonal de jonction H=3xD	3-47	3-47	3-48
 Hexagon connection nut high Zeskant verbindingsmoer hoog / Écrou hexagonal de jonction haut	3-49	3-49	-
 Self-locking hexagon nut with toothed flange Zelfborgende zeskantflensmoer met vertanding / Écrou de sécurité hexagonal à embase crantée	3-56	-	-
 Self-locking hexagon nut with ribbed flange Zelfborgende zeskantflensmoer met ribben / Écrou de sécurité hexagonal à embase crantée	3-57	-	-
 Prevailing torque type hexagon nut Zelfborgende zeskantmoer / Écrou auto-freiné hexagonal	-	-	3-67
 Prevailing torque type slotted round nut with non-metallic insert type GUK Zelfborgende ronde moer met gleuven en kunststof ring type GUK / Écrou cylindrique autofreiné à encoches GUK	3-73	-	-
 INLOC Prevailing torque type hexagon nut, all metal INLOC zelfborgende zeskantmoer, geheel metaal / INLOC Écrou hexagonal autofreiné, tout métal	-	3-82	-
 Prevailing torque type hexagon nut, all metal H100-ESN Zelfborgende zeskantmoer geheel metaal type H100-ESN / Écrou auto-freiné hexagonal, tout métal type H100-ESN	3-86	3-86	3-87
 Prevailing torque type hexagon nut, all metal H130-ESN Zelfborgende zeskantmoer geheel metaal type H130-ESN / Écrou auto-freiné hexagonal tout métal type H130-ESN	3-87	-	-
 Prevailing torque type hexagon nut, all metal USN Zelfborgende zeskantmoer geheel metaal type USN / Écrou auto-freiné hexagonal tout métal type USN	3-88	-	-
 Hexagon nut with captive conical washer, COMBY Moer met conische ring COMBY / Écrou hexagonal avec rondelle mobile COMBY	-	3-89	-
 COMBY Hexagon nut with captive toothed lock washer Zeskantmoer met onverliesbare vertande ring COMBY / Écrou hexagonal avec rondelle à dents incorporée COMBY	3-89	-	-
 THERMAG Prevailing torque type hexagon exhaust nut, all metal THERMAG uitlaatmoer / THERMAG Écrou pour tuyau d'échappement, tout métal	3-108	-	-
 Round connection nut Ronde verbindingsmoer / Écrou cylindrique de jonction	3-112	3-113	-
 Wing nut with rounded wings Vleugelmoer ronde vleugelvorm / Écrou à oreilles arrondies	-	-	3-121
 Wing nut with rounded wings and collar Vleugelkraagmoer ronde vleugelvorm / Écrou à oreilles arrondies à embase	-	-	3-121

	Steel	Stainless steel	Non-ferrous
 Knurled nut Kartelmoer / Écrou moleté	-	-	3-124
 Weld nut with smooth flange Lasmoer met gladde flens / Écrou à souder avec bride lisse	3-127	3-127	-
 Projection weld nut with flange Puntlasmoer met flens / Écrou à souder par point	3-128	3-128	-
 Nord-Lock Hexagon wheelnut Zeskant wielmoer Nord-Lock / Écrou de roue Nord-Lock	3-130	-	-
 Slotted countersunk nut Verzonken moer met zaaggleuf / Écrou fraisé à fente	3-133	-	-
 Pointed nut Puntmoer / Écrou à pointe	3-133	-	-
 Cage nut type SMG Kooimoer type SMG / Écrou à pincer type SMG	3-134	3-134	-
 Jacknut Blindspreidmoer / Écrou rapide Jacknut	3-135	-	-
 Square trackshoe nut Trackshoemoer vierkant / Écrou carré Trackshoe	3-175	-	-
 Hexagon trackshoe nut thin Trackshoemoer zeskant laag / Écrou hexagonal Trackshoe bas	3-175	-	-
 Prevailing torque type hexagon nut with non-metallic insert Zelfborgende zeskantmoer met kunststof ring / Écrou auto-freiné hexagonal avec anneau non-metallique	3-178	-	-
 Hexagon domed cap nut Dopmoer / Écrou hexagonal borgne	3-179	-	-
 Speednut type SNU Snapmoer type SNU / Écrou à pincer type SNU	3-183	-	-
 Round rivet bush Felsmoer rond / Écrou à sertir cylindrique	10-186	-	-
 Self-clinching round rivet bush SWG Felsmoer, rond, SWG / Écrou à sertir cylindrique SWG	10-187	10-188	-
 Self-clinching hexagon rivet bush SWG Felsmoer, zeskant, SWG / Écrou à sertir hexagonal	10-188	-	-

	Steel	Stainless steel	Non-ferrous
 Self-clinching round nut Inpersmoer, rond / Écrou rond à tôle	10-190	-	-
 Self-clinching flush head stud Inpers draadeinden, verzonken kop / Goujon à tête affleurante auto-fixant	10-190	10-191	-
 Hex press nut Zetmoer / Écrou à tôle	10-192	10-192	-

4 Threaded rods and studbolts

	Steel	Stainless steel	Non-ferrous
 Permaglas, threaded rod, various lengths Permaglas, draadeind, diverse lengtes / Permaglas, tige filetée, longueurs différentes	-	-	4-19
 Permaglas, hexagon nut Permaglas, zeskant moer / Permaglas, écrou hexagonale	-	-	4-20
 Permaglas, plain washer Permaglas, sluitring / Permaglas, rondelle	-	-	4-21
 Threaded rod, 3 feet Draadstang, 3 voet / Tige filetée, 3 pieds	4-29	-	4-29
 Threaded rod, trapezoidal, 1 meter Draadstang trapezium, 1 meter / Tige filetée à filetage trapézoïdal, 1 mètre	4-30	4-31	-
 Threaded rod, trapezoidal, 3 meter Draadstang trapezium, 3 meter / Tige filetée à filetage trapézoïdal, 3 mètres	4-30	4-31	-
 Round nut, trapezoidal, 1,5xD Ronde moer Tr 1,5xD / Écrou cylindrique à filetage trapézoïdal 1,5xD	4-31	4-32	-
 Round nut, trapezoidal, 2,0xD Ronde moer Tr 2,0xD / Écrou cylindrique à filetage trapézoïdal 2,0xD	-	-	4-32
 Hexagon nut, trapezoidal, 1,5xD Zeskantmoer, trapezium, 1,5xD / Écrou hexagonal à filetage trapézoïdal 1,5xD	4-33	-	-
 Threaded rod for shuttering Bekistingsdraadstang / Tige de coffrage	4-34	-	-
 Hexagon nut for shuttering Zeskantmoer voor bekistingsdraadstangen / Écrou pour tige de coffrage	4-34	-	-
 Stud metal end ≈ 1,25d Tapeind inschroefflengte ≈ 1,25d / Goujon longueur d'implantation ≈ 1,25d	4-82	-	-

5 Hook and eye products

	Steel	Stainless steel	Non-ferrous
 T-head bolt type 28/15 Hamerkopbout type 28/15 / Vis à tête marteau type 28/15	-	5-5	-
 D (chain) shackle D-Sluiting / Manille droite	5-22	5-24	-
 Bow (anchor) shackle with screw collar pin Harpsluiting met oogschroefpen / Manille lyre avec vis à oeil	5-25	-	-
 Bow (anchor) shackle with screw collar pin Bow (anchor) shackle with screw collar pin / Manille lyre avec vis à oeil	-	5-26	-
 Wire rope clip Staaldraadklem / Serre-câble à étrier	-	5-28	-
 Thimble Puntkous / Cosse pour câbles	5-29	-	-
 Carabine hook Karabijnhaak / Mousqueton	5-30	5-30	-
 Screw eye Schroefoog / Piton	5-31	5-31	-
 Screw eye for wood Schroefoog met houtschroefdraad / Piton bois	5-32	5-32	5-32
 Screw eye for wood, heavy type Schroefoog met houtschroefdraad, zware uitvoering / Piton bois lourd	5-33	-	-
 Screw eye for wood, long type Schroefoog met houtschroefdraad, lange uitvoering / Piton bois longue	5-33	-	-
 Cup hook Schroefhaak / Crochet d'armoire	5-34	-	-
 Cup hook for wood Schroefhaak met houtschroefdraad / Crochet d'armoire pour bois	5-35	-	-
 Cup hook for wood, with small hook Schroefhaak met houtschroefdraad, met kleine haak / Crochet d'armoire avec petit crochet pour bois	5-36	-	-
 Screw eye Schroefduim / Gond à vis	5-36	-	-
 Square hook for wood Schroefduim met houtschroefdraad / Gond à vis à bois	5-37	-	-

	Steel	Stainless steel	Non-ferrous
 Square hook for wood, heavy with cross recess Schroefduim met hout Schroefdraad, met kruisgleuf / Gond à vis à bois à empreinte cruciforme	5-38	-	-
 Square hook for wood, slotted Schroefduim met hout Schroefdraad, met zaagsnede / Gond à vis à bois fendu	5-38	-	-
 Square hook for wood, hexalobular socket Schroefduim met hout Schroefdraad, met T-ster / Gond à vis à bois à six lobes internes	5-39	-	-
 Square hook pin Puntduim / Gond à pointe	5-39	-	-
 Dowel screw with round shank Stokeind met ronde schacht / Vis à double filetage avec section lisse	5-40	5-41	-
 Dowel screw with hexagonal shank Stokeind met zeskant / Vis à double filetage avec section hexagonale	5-42	5-43	-
 Curlhook Krulhaak / Crochet de boucle	-	5-44	-
 Safety swing hook with 3 hexagon nuts Veiligheidsschommelhaak met 3 moeren / Crochet de balançoire de sûreté avec 3 écrous	5-45	-	-
 Safety swing hook for wood Veiligheidsschommelhaak met hout Schroefdraad / Crochet de balançoire de sûreté non-métrique	5-46	-	-
 Welded ring for safety swing hooks Dichtgelaste ring voor veiligheidsschommelhaken / Anneau soudé pour crochet à balancier	5-46	-	-
 Gate hook with 2 screw eyes Windhaak met 2 schroefogen / Crochet de contrevent	-	5-46	-
 S-hook S-haak / Crochet en S	5-47	-	-

6 Screws

	Steel	Stainless steel	Non-ferrous	Other
 Slotted mushroom head screw small head Laagbolkop schroef met zaagsnede en kleine kop / Vis à tête bombée fendue, réduite	-	6-53	-	
 Slotted mushroom head Laagbolkopschroef met zaaggleuf / Vis à tête bombée fendue	6-64	-	-	
 Hexalobular socket countersunk head thread cutting screw Zelfdraadsnijdende verzonken schroef met T-ster / Vis autotaraudeuse à tête fraisée à six lobes internes	6-89	-	-	

	Steel	Stainless steel	Non-ferrous	Other
 <p>Thread rolling raised cheese head screw hexalobular Zelfdraadvormende bolcilinderschroef met T-ster / Vis autoformeuse à tête cylindrique bombée à six lobes internes</p>	6-95	6-96	-	
 <p>Thread rolling countersunk head screw hexalobular Zelfdraadvormende verzonken schroef met T-ster / Vis autoformeuse à tête fraisée à six lobes internes</p>	6-96	6-97	-	
 <p>Cross recessed raised cheese head thread rolling screw Zelfdraadvormende bolcilinderschroef met kruisgleuf / Vis autoformeuse à tête cylindrique bombée à empreinte cruciforme</p>	6-98	6-98	-	
 <p>Thread rolling countersunk head screw Zelfdraadvormende verzonken schroef / Vis autoformeuse à tête fraisée</p>	6-99	6-99	-	
 <p>Pan head PZ thread rolling screw Zelf draadvormende schroeven, pancilinderkop (Z) / Vis autoformeuse à tête cylindrique bombée PZ</p>	6-102	-	-	
 <p>Countersunk PZ thread rolling screw Zelf draadvormende schroeven, verzonken kop (Z) / Vis autoformeuse à tête fraisée PZ</p>	6-103	-	-	
 <p>Hex washer head thread rolling screw Zelf draadvormende schroeven, zeskant kop / Vis autoformeuse à tête hexagonale à embase</p>	6-104	-	-	
 <p>Countersunk PZ screw for plastic 45° Zelf draadvormende schroeven voor plastic, 45°, verzonken kop (Z) / Vis à tête fraisée PZ pour plastiques 45°</p>	6-105	6-105	-	
 <p>Flange head PZ screw for plastic 45° Zelf draadvormende schroeven voor plastic, 45°, flenskop (Z) / Vis à tête cylindrique bombée plate PZ à embase plate pour le plastique 45°</p>	6-106	6-106	-	
 <p>Pan head TX screw for plastic 45° Panlinderkop TX schroef voor plastic, 45° / Vis à tête cylindrique bombée TX pour plastiques 45°</p>	6-107	6-107	-	
 <p>Countersunk TX screw for plastic 45° Zelf draadvormende schroeven, 45°, verzonken kop, hexalobular / Vis à tête fraisée TX pour plastiques 45°</p>	6-108	6-108	-	
 <p>Pan head PZ screw for plastic 60° Panlinderkop PZ schroef voor plastic, 60° / Vis à tête cylindrique bombée PZ pour plastiques 60°</p>	6-109	-	-	
 <p>Countersunk PZ screw for plastic 60° Zelf draadvormende schroeven voor plastic, 60°, verzonken kop (Z) / Vis à tête fraisée PZ pour plastiques 60°</p>	6-110	-	-	
 <p>Pan head PZ screw for plastic 45° Panlinderkop PZ schroef voor plastic, 45° / Vis à tête cylindrique bombée PZ pour plastiques 45°</p>	6-111	6-111	-	
 <p>Cross recessed raised cheese head thread forming screw Zelfdraadvormende bolcilinderschroef met kruisgleuf / Vis autoformeuse à tête cylindrique bombée à empreinte cruciforme</p>	6-112	-	-	
 <p>Raised cheese head thread forming screw with Torx®recess Zelfdraadvormende bolcilinderschroef met Torx® / Vis autoformeuse à tête cylindrique bombée à empreinte Torx®</p>	6-113	-	-	

	Steel	Stainless steel	Non-ferrous	Other
 <p>Cross recessed mushroom head thread forming screw Zelfdraadvormende platbolkopschroef met kruisgleuf / Vis autoformeuse à tête ronde à empreinte cruciforme</p>	6-113	-	-	
 <p>Pan head PZ screw for plastic 30° Panclinderkop PZ schroef voor plastic, 30° / Vis à tête cylindrique bombée PZ pour plastiques 30°</p>	6-114	6-114	-	
 <p>Countersunk PZ screw for plastic 30° Zelf draadvormende schroeven voor plastic, 30°, verzonken kop (Z) / Vis à tête fraisée PZ pour plastiques 30°</p>	6-116	6-116	-	
 <p>Flange head screw for plastic 30° Zelf draadvormende schroeven voor plastic, 30°, flenskop (Z) / Vis à tête cylindrique bombée plate PZ à embase plate pour le plastique 30°</p>	-	6-117	-	
 <p>Flange head screw for plastic 30° Zelf draadvormende schroeven voor plastic, 30°, flenskop (Z) / Vis à tête cylindrique bombée plate PZ à embase plate pour le plastique 30°</p>	6-118	-	-	
 <p>Pan head TX screw for plastic 30° Panclinderkop TX schroef voor plastic, 30° / Vis à tête cylindrique bombée TX pour plastiques 30°</p>	6-120	6-119	-	
 <p>Countersunk TX screw for plastic 30° Zelf draadvormende schroeven, 30°, verzonken kop, hexalobular / Vis à tête fraisée TX pour plastiques 30°</p>	6-121	6-121	-	
 <p>Flange head TX screw for plastic 30° Zelf draadvormende schroeven voor plastic, 30°, flenskop (TX) / Vis à tête cylindrique bombée plate TX à embase plate pour le plastique 30°</p>	6-122	6-122	-	
 <p>Tapping screw socket head Plaatschroef met cilinderkop en binnenzeskant / Vis à tête cylindrique à six pans creux</p>	-	6-154	-	
 <p>Tapping screw caphead hexalobular Pancilinderplaatschroef, T-ster / Vis à tête cylindrique bombée six lobes internes</p>	-	6-155	-	
 <p>Countersunk head screw for thermo plastics Verzonken schroef voor kunststof / Vis à tête fraisée pour thermoplastiques</p>	6-156	6-156	-	
 <p>Pan head screw for thermo plastics Pancilinderschroef voor kunststof / Vis autoformeuse à tête cylindrique bombée pour plastiques</p>	6-157	6-157	-	
 <p>Cross recessed caphead tapping screw Pancilinderplaatschroef met kruisgleuf / Vis à tête cylindrique à empreinte cruciforme</p>	6-161	6-161	-	
 <p>Cross recessed pan head tapping screw rst-z Plaatschroef pancilinderkop met kruisgleuf rst-z / Vis à tête cylindrique bombée large rst-z</p>	6-164	-	-	
 <p>Hexalobular pan head screws rst T-ster plaatschroef pancilinderkop rst / Vis à tête bombée Torx rst</p>	6-165	-	-	
 <p>Cross recessed pan head tapping screw with collar rst-z Plaatschroef pancilinderkop met kruisgleuf met kraag rst-z / Vis à tête cylindrique bombée à embase plate rst-z</p>	6-166	-	-

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W7, TRD106 and DIN 267-13.
- Manufacturers included in VdTUV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W7, TRD106 and DIN 267-13.
- Manufacturers included in VdTUV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.

- Oversized hot dip galvanized bolts and screws are manufactured with standard thread tolerance class 6g before coating.
- After galvanizing they will therefore NOT fit into standard nuts or threaded holes with thread tolerance class 6H. Suitable nuts have been tapped with thread tolerance class 6AZ (oversized).

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W2, TRD106 and DIN 267-13.
- Manufacturers included in VdTUV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.
- Sizes with a diameter > M24 are minimal property class 50.

51000 Hexagon head bolt / Zeskantbout / Vis à tête hexagonale filetage partiel Q01A

Thread Metric thread

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W2, TRD106 and DIN 267-13.
- Manufacturers included in VdTUV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.
- Sizes with a diameter > M24 are minimal property class 50.

- Specific features of fasteners for pressure vessels:
- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
 - Meets the requirements of AD2000-W7, TRD106 and DIN 267-13.
 - Manufacturers included in VdTÜV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W7, TRD106 and DIN 267-13.
- Manufacturers included in VdTÜV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.

04112 Hexagon head screw / Zeskantapbout / Vis à tête hexagonale filetage total

C01A

Thread Metric thread
Material Steel
Class 10.9
Surface treatment Zinc plated

DIN 933

52011 Hexagon head screw / Zeskanttapbout / Vis à tête hexagonale filetage total ←

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W2, TRD106 and DIN 267-13.
- Manufacturers included in VdTUV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.
- Sizes with a diameter > M20 and sizes with a length > 8xd are minimal property class 50.

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W2, TRD106 and DIN 267-13.
- Manufacturers included in VdTUV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.
- Sizes with a diameter > M24 are minimal property class 50.

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W2, TRD106 and DIN 267-13.
- Manufacturers included in VdTUV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.
- Sizes with a diameter > M20 and sizes with a length > 8xd are minimal property class 50.

- Titanium Grade 2 (3.7035), due to the high content of pure titanium, performs excellently in those extremely corrosive environments where other materials such as e.g. stainless steel fail.

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10°C up to +300°C.
- Meets the requirements of AD2000-W7, TRD106 and DIN 267-13
- Manufacturers included in VdTUV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.

- Full boxes only.
- European constructions must comply with the Construction Products Regulation (CPR) in order to ensure the safety of persons and objects.
- Generally, construction products according to harmonized European standards (hEN standards) should be used for this purpose. Bolting assemblies for non-preloaded structural bolting according to EN 15048-1 are compliant with the CPR.
- The manufacturer of the assemblies is CE certified for their production.
- Bolts and nuts are packaged together in single sealed boxes.
- A Declaration of Performance (DoP) is available.

- Full boxes only.
- European constructions must comply with the Construction Products Regulation (CPR) in order to ensure the safety of persons and objects.
- Generally, construction products according to harmonized European standards (hEN standards) should be used for this purpose. Bolting assemblies for non-preloaded structural bolting according to EN 15048-1 are compliant with the CPR.
- The manufacturer of the assemblies is CE certified for their production.
- Bolts and nuts are packaged together in single sealed boxes.
- A Declaration of Performance (DoP) is available.

- Full boxes only.
- European constructions must comply with the Construction Products Regulation (CPR) in order to ensure the safety of persons and objects.
- Generally, construction products according to harmonized European standards (hEN standards) should be used for this purpose. Bolting assemblies for non-preloaded structural bolting according to EN 15048-1 are compliant with the CPR.
- The manufacturer of the assemblies is CE certified for their production.
- Fit bolts DIN 7968 and nuts ISO 4032 are packaged together in single sealed boxes.
- A Declaration of Performance (DoP) is available.

- PEINER HV-bolts and corresponding HV-nuts and HV-washers, sizes M12 up to M36 are specified in EN 14399-4 and EN 14399-6. Diameters M39 up to M72 are defined in DASt directive 021.
- PEINER HV-bolts with associated HV-nuts and HV-washers may be used only as a set from one and the same supplier.

Specific features of hexagon bolts with flange:

- The flange enables built up forces under the bolt head to be spread over a larger area, consequently resulting in lower surface pressure.
- Large (oversized) holes and/or tooling holes can be covered by the flange.
- Washers are not necessary.

- Specific features of hexagon bolts with serrated flange:
- The flange enables built up forces under the bolt head to be spread over a larger area, consequently resulting in lower surface pressure.
 - The serrated flange rim gives excellent self-locking properties.
 - Large (oversized) holes and/or tooling holes can be covered by the flange.
 - Washers are not necessary.

These self-locking hexagon flange bolts are designed properly class 90 or 100. The flange bolts are case hardened in order to perform their self-locking function, and therefore cannot be classified as properly class 5.8 or 8.8, although their tensile strength is at least 500 resp. 600 MPa.

Special features of these self-locking flange bolts are:

- The rolled toothed flange causes excellent self-locking properties.
- The smooth bearing surface in the center of the flange guarantees a high clamping force and reduces vibration.
- Large (oversized) or slotted holes can be covered by the flange.
- No other locking elements or washers are necessary.

The below table provides values for the minimal assembly preload (F_B in MN) and tightening torque (M_A in Nm) for use with clamped materials as indicated.

M12	24	10	1.75	17
M16	31	14	2.00	22

These self-locking hexagon flange bolts with ribbed flange are designed properly class 100. The flange bolts are case hardened in order to perform their self-locking function, and therefore cannot be classified as properly class 10.9, although their tensile strength is at least 1040 MPa.

Special features of these self-locking flange bolts are:

- The ribbed flange eliminates surface damage during assembly, prevents self-loosening and reduces vibration.
- The flange enables built up forces under the bolt head to be spread over a larger area, consequently resulting in lower surface pressure.
- Large (oversized) or slotted holes can be covered by the flange.
- No other locking elements or methods are necessary.

The below table provides values for the minimal assembly preload (F_B in N) and tightening torque (M_A in Nm) for use with cleaned materials as indicated.

Cleaned material	M5		M6		M8		M10		M12		M16	
	F _B	M _A	F _B	M _A	F _B	M _A	F _B	M _A	F _B	M _A	F _B	M _A

- Oversized hot dip galvanized bolts and screws are manufactured with standard thread tolerance class 6g before coating.
- After galvanizing they will therefore NOT fit into standard nuts or threaded holes with thread tolerance class 6H. Suitable nuts have been tapped with thread tolerance class 6AZ (oversized).

Carriage bolt

Slotbout / Vis à tête bombée à collet carré

- Oversized hot dip galvanized bolts and screws are manufactured with standard thread tolerance class 2A before coating.
- After galvanizing they will therefore NOT fit into standard nuts or threaded holes with thread tolerance class 2B. Suitable nuts must be tapped oversized as per ASTM A563.

- Oversized hot dip galvanized bolts and screws are manufactured with standard thread tolerance class 2A before coating.
- After galvanizing they will therefore NOT fit into standard nuts or threaded holes with thread tolerance class 2B. Suitable nuts must be tapped oversized as per ASTM A563.

U08440 Hexagon head tower bolt UNC oversized thread / Zeskant mastbout UNC overmaats / Boulon de tours de transmission filetage UNC en surcote ←

- Oversized hot dip galvanized bolts and screws are manufactured with standard thread tolerance class 2A before coating.
- After galvanizing they will therefore NOT fit into standard nuts or threaded holes with thread tolerance class 2B. Suitable nuts must be tapped oversized as per ASTM A563.

56120 Hexagon socket head cap screw fully threaded / Cilinderschroef met binnenzeslant vordraad / Vis à tête cylindrique à six pans creux filetage total **W02A**

Thread Metric thread
Material Plastic Polyamide (nylon)
Class 6.6
Color White

- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Steel fasteners with reduced loadability are marked with a '0' preceding the property class mark, e.g. '010.9'.
- Stainless steel fasteners with reduced loadability are either marked with a '0' preceding the property class mark, e.g. 'A2-070', or with the steel grade only, e.g. 'A2'.

- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Steel fasteners with reduced loadability are marked with a '0' preceding the property class mark, e.g. '010.9'.
- Stainless steel fasteners with reduced loadability are either marked with a '0' preceding the property class mark, e.g. 'A2-070', or with the steel grade only, e.g. 'A2'.

These self-locking hexagon socket head cap screws are designated properly class "100". The screws are case hardened in order to perform their self-locking function, and therefore cannot be classified as properly class 12.9, although their tensile strength is at least 1040 MPa.

Special features of these self-locking screws are:

- The flange with its rounded radial ribs eliminates surface damage during assembly, prevents self-loosening and reduces vibration.
- The flange enables built up forces under the head to be spread over a larger area, consequently resulting in a lower surface pressure.
- Large (downward) or stalled holes can be covered by the flange.
- No other locking elements or methods are necessary.

The below table provides values for the advised assembly preload (F_B in kN) and tightening torque (M_A in Nm) for use with classical materials as indicated.

Classical material	M 5		M 6		M 8		M 10		M 12	
	F _B	M _A	F _B	M _A	F _B	M _A	F _B	M _A	F _B	M _A
Steel (F _{0.2} < 1000 MPa)	9	13	12.6	24	23.2	46	37	58	54	150
Steel (F _{0.2} ≥ 1000 MPa)	9	11	12.6	20	23.2	42	37	55	54	140
Malleable iron	9	10	12.6	19	23.2	39	37	55	54	120

- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Steel fasteners with reduced loadability are marked with a '0' preceding the property class mark, e.g. '010.9'.
- Stainless steel fasteners with reduced loadability are either marked with a '0' preceding the property class mark, e.g. 'A2-070', or with the steel grade only, e.g. 'A2'.

- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Steel fasteners with reduced loadability are marked with a '0' preceding the property class mark, e.g. '010.9'.
- Stainless steel fasteners with reduced loadability are either marked with a '0' preceding the property class mark, e.g. 'A2-070', or with the steel grade only, e.g. 'A2'.

Hexagon socket button head screw with large head

Laagbolkop Schroef met binnenzeskant en grote kop / Vis à tête cylindrique bombée plate à six pans creux avec tête large

Technical Data

d	dk	k	s
M8	17	4.4	5.5

- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Steel fasteners with reduced loadability are marked with a '0' preceding the property class mark, e.g. '010.9'.
- Stainless steel fasteners with reduced loadability are either marked with a '0' preceding the property class mark, e.g. 'A2-070', or with the steel grade only, e.g. 'A2'.
- These screws are fully threaded.

- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Steel fasteners with reduced loadability are marked with a '0' preceding the property class mark, e.g. '010.9'.
- Stainless steel fasteners with reduced loadability are either marked with a '0' preceding the property class mark, e.g. 'A2-070', or with the steel grade only, e.g. 'A2'.

- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Steel fasteners with reduced loadability are marked with a '0' preceding the property class mark, e.g. '010.9'.
- Stainless steel fasteners with reduced loadability are either marked with a '0' preceding the property class mark, e.g. 'A2-070', or with the steel grade only, e.g. 'A2'.

- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Steel fasteners with reduced loadability are marked with a '0' preceding the property class mark, e.g. '010.9'.
- Stainless steel fasteners with reduced loadability are either marked with a '0' preceding the property class mark, e.g. 'A2-070', or with the steel grade only, e.g. 'A2'.

- These set screws are designed for pressure loads and are not suitable for tensile- or shear loads.
- These set screws (thrust screws) are ideal for clamping or exerting pressure on threaded spindles, axles, shafts and coated surfaces without causing damage to the clamped material.

U07000 Hexagon socket head cap screw UNC 1960 series / Cilinderschroef met binnenzekant UNC 1960 serie / Vis à tête cylindrique à six pans creux série 1960 UNC ←

- Marking in accordance with ASTM A574 with manufacturer's identification mark only.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.
- Warning: electroplating of these products may cause hydrogen embrittlement.
- ft = fully threaded

U07001 Hexagon socket head cap screw UNC 1960 series / Cilinderschroef met binnenzekant UNC 1960 serie / Vis à tête cylindrique à six pans creux série 1960 UNC X05A

Thread	Unified National Coarse
Material	Alloy steel ASTM A574
Surface treatment	Zinc plated

- Marking in accordance with ASTM A574 with manufacturer's identification mark only.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.
- Warning: electroplating of these products may cause hydrogen embrittlement.
- ft = fully threaded

U51050 Hexagon socket head cap screw UNC 1960 series / Cilinderschroef met binnenzekant UNC 1960 serie / Vis à tête cylindrique à six pans creux série 1960 UNC X15A

Thread	Unified National Coarse
Material	Stainless steel ASTM F837 304
Class	CW / CW1

- Marking in accordance with ASTM A574 with manufacturer's identification mark only.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.
- Warning: electroplating of these products may cause hydrogen embrittlement.

- Marking in accordance with ASTM A574 with manufacturer's identification mark only.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.
- Warning: electroplating of these products may cause hydrogen embrittlement.
- ft = fully threaded

- Marking in accordance with ASTM A574 with manufacturer's identification mark only.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.
- Warning: electroplating of these products may cause hydrogen embrittlement.
- ft = fully threaded

- Marking in accordance with ASTM A574 with manufacturer's identification mark only.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.
- Warning: electroplating of these products may cause hydrogen embrittlement.

1.1/4	2.438	0.683	7/8	3.12	7

- All dimensions in above table are in inches.
- Marking of these screws is not mandatory.
- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.

- All dimensions in above table are in inches.
- Marking of these screws is not mandatory.
- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.

Hexagon socket button head screw UNF

Laagbolkopschroef met binnenzeskant UNF / Vis à tête cylindrique bombée plate à six pans creux UNF

Technical Data				
d	A	H	J	Threads per inch
No.0	0.114	0.032	0.035	80
No.1	0.139	0.039	0.050	72
No.10	0.361	0.101	1/8	32
1/4	0.437	0.132	5/32	28
5/16	0.547	0.166	3/16	24
3/8	0.656	0.199	7/32	24

- All dimensions in above table are in inches.
- Marking of these screws is not mandatory.
- Due to the unfavourable head geometry these fasteners have reduced loadability.
- Attention: As the thread tolerance class for thread sizes up to and including 1 inch is 3A, plating can cause thread fit problems.

Examples of application

Special features for covers for hexagon socket screws:

- prevent corrosion and dirt accumulation in socket hole
- neat appearance
- easy to assemble and re-usable
- temperature resistant from -80°C up to +120°C
- colour traffic grey A. RAL 7042
- ATTENTION: heads of hexagon socket screws can be partly covered by these covers

- Specific features of fasteners for pressure vessels:
- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
 - Meets the requirements of AD2000-W7, TRD106 and DIN 267-13.
 - Manufacturers included in VdTÜV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.

 - ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
 - As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.

- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.

Specific features of fasteners for pressure vessels:

- Intended for use in pressure vessels, steam appliances, equipment and flange connections at temperatures from -10 °C up to +300 °C.
- Meets the requirements of AD2000-W7, TRD106 and DIN 267-13.
- Manufacturers included in VdTÜV-Merkblatt 1253/4 are entitled to replace a certificate EN 10204 3.1 by marking the fasteners with the property class and the manufacturer's mark. This recognition is equally accepted by Lloyd's Register Energy.

- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.
- NL- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.
- FR- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.

- Sizes with a diameter > M20 are minimal property class 50.

Specific features of Metalform:

- The fixed, slightly visible dry film lubricant reduces the effect of galling.
- It levels out the big scatter in coefficient of friction and reduces the average value.
- In a bolt/nut assembly only one product (e.g. the nut) needs to be lubricated with Metalform.
- The lubricant can easily be removed with a solvent after assembly, there's no objection against application in the food industry.

- Stabilized stainless steel 1.4571 is essentially a standard A4 stainless steel type with titanium.
- The addition of titanium is made to reduce the risk of intergranular corrosion (IC) after welding.
- 1.4571 is mainly applied in inaccessible constructions and constructions with moderate exposure to chloride and sulfur dioxide.
- Due to its titanium content it is not high-gloss polishable.

- Stainless steel 1.4539 provides good corrosion resistance to non-oxidizing acids such as e.g. sulfuric acid under reducing conditions.
- This type of stainless steel is mainly used in the chemical industry.
- Due to its low carbon content, it is generally applicable after welding without thermal after-treatment.

- The popular duplex stainless steel type 1.4462 offers a particularly good resistance to pitting and intercrystalline corrosion.
- Characteristics of both austenitic and ferritic stainless steels are present in this material, it combines the higher tensile strength of the ferritic chrome steels with the corrosion resistance of the austenitic chrome/nickel steels.

53081	Hexagon nut / Zeskantmoer / Écrou hexagonal			Q72A

- HCR (*High Corrosion Resistant*) alloy 1.4529 is a so-called super austenitic stainless steel.
- It provides particularly good resistance to chloride induced stress corrosion and to local occurrences of corrosion such as pitting or crevice corrosion.
- This alloy is classified in the highest class CRC V (very strong, EN 1993-1-4) for components and fasteners.
- Fasteners in 1.4529 are therefore ideal for use in indoor swimming pools and traffic tunnels.

- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.

- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.

- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.

- HCR (*High Corrosion Resistant*) alloy 1.4529 is a so-called super austenitic stainless steel.
- It provides particularly good resistance to chloride induced stress corrosion and to local occurrences of corrosion such as pitting or crevice corrosion.
- This alloy is classified in the highest class CRC V (very strong, EN 1993-1-4) for components and fasteners.
- Fasteners in 1.4529 are therefore ideal for use in indoor swimming pools and traffic tunnels.

Specific features of hexagon nuts with flange:

- The flange enables built up forces under the nut to be spread over a larger area, consequently resulting in lower surface pressure.
- Large (oversized) holes and/or tooling holes can be covered by the flange.
- Washers are not necessary.

These self-locking hexagon flange nuts are designed properly class 8 (M 5 - M 10) or 10 (M 12 - M 16). Class 8 nuts are to be used with bolts in class 8.8 or class 9.8, and class 10 nuts mate with bolts in property class 10.9 or 12.9.

Special features of these self-locking flange nuts are:

- The radial toothed flange ensures excellent self-locking properties.
- The smooth bearing surface in the center of the flange guarantees a high clamping force and reduces vibration.
- Large (vertical) or slotted holes can be covered by the flange.
- No other locking elements or washers are necessary.

The below table provides values for the initial assembly preload (F_{II} in N) and tightening torque (M_A in Nm) for use with cleaned materials as indicated.

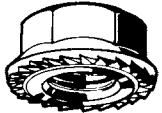

Class	Cleaned material	M 5		M 6		M 8		M 10		M 12		M 16

M8	18.2	7	1.25	13	M16	31	14	2.00	22	

These self-locking hexagon flange nuts are designed properly class 10.

Special features of these self-locking flange nuts are:

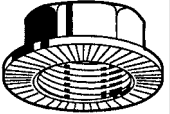

- The ribbed flange eliminates surface damage during assembly, prevents self-loosening and reduces vibration.
- The flange creates built up forces under the bolt head to be spread over a larger area, consequently resulting in lower surface pressure.
- Large (pre-loaded) or shalled bolts can be covered by the flange.
- No other locking elements or washers are necessary.

The below table provides values for the advised assembly torque (F_{Tb} in Nm) and tightening torque (M_{Tb} in Nm) for use with cleaned materials as indicated.

M16	34.5	16	2.00	24

Thanks to its unique thread configuration the Spirallock flange nut offers a perfect solution where a joint must be reliably tightened and locked. Benefits of the Spirallock flange nut are a.o.:

- Exceptionally resistant to vibration loosening
- Eliminates need for other locking devices
- Accepts standard male fasteners (with thread tolerance class 4g6g, 6g, 6h and MJ)
- Improves joint fatigue life
- Consistent reusability
- Eases assembly, reducing assembly time
- Reduces life cycle cost of threaded joints

Because of the Spirallock design, threaded joints generally require 10% - 20% greater torque than is required for standard joints, due to the redirecting of some assembly forces from an axial direction to a radial direction. The increase in torque will vary depending on the types of materials and coatings being used (nut, bolt, joint, etc.). This torque/tension relationship should be evaluated in the actual joint to determine the proper torque required to develop the specified tension. Guidance available through our Technology Department.

- Stainless steel prevailing torque type hexagon nuts may cause seizing of the mating threads resulting in fracture.
- It is recommended to use stainless steel prevailing torque type hexagon nuts treated with an agent to reduce this risk or use an anti-seize- or lubricating compound.

51726 Prevailing torque type hexagon nut with non-metallic insert / Zelfborgende zeskantmoer met kunststof ring / Écrou auto-freiné hexagonal avec anneau non-metallique **R09A**

Thread Metric thread
Material Stainless steel A2
Surface treatment Zinc plated

d	☒	Art.number	d	☒	Art.number	d	☒	Art.number

M6	100	51729.060.001	M12	25	51729.120.001			

Specific features of Metalform:

- The fixed, slightly visible dry film lubricant reduces the effect of galling.
- It levels out the big scatter in coefficient of friction and reduces the average value.
- In a bolt/nut assembly only one product (e.g. the nut) needs to be lubricated with Metalform.
- The lubricant can easily be removed with a solvent after assembly, there's no objection against application in the food industry.

- Stainless steel prevailing torque type hexagon nuts may cause seizing of the mating threads resulting in fracture.
- It is recommended to use stainless steel prevailing torque type hexagon nuts treated with an agent to reduce this risk or use an anti-seize- or lubricating compound.

- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.

- HCR (*High Corrosion Resistant*) alloy 1.4529 is a so-called super austenitic stainless steel.
- It provides particularly good resistance to chloride induced stress corrosion and to local occurrences of corrosion such as pitting or crevice corrosion.
- This alloy is classified in the highest class CRC V (very strong, EN 1993-1-4) for components and fasteners.
- Fasteners in 1.4529 are therefore ideal for use in indoor swimming pools and traffic tunnels.

- ISO metric hot dip galvanized nuts are manufactured with thread tolerance class 6H and mate with externally threaded parts (bolts, threaded rods) that are manufactured with thread tolerance class 6az before coating.
- As the nut thread is tapped after galvanizing the threads are not coated. The corrosion resistance however is not influenced disadvantageously as the thread will be protected by the zinc layer of the mating part.

The self-locking function of the nut is realized by the elastic, axial displacement of the partly separated and compressed parts of the nut in relation to each other. The nut runs freely on the bolt until the groove is reached. With further rotation the clamping force on the thread flanks is achieved by the elastic reaction of the material, independent of the torque.

Special features of prevailing torque type H100-ESN hexagon nuts:

- Reversible – the locking slot is placed in the middle of the nut.
- Re-useable up to 5 times without significant performance loss.
- Resistant to shocks, vibrations and dynamic loads.
- Suitable for automatic assembly.

- HCR (*High Corrosion Resistant*) alloy 1.4529 is a so-called super austenitic stainless steel.
- It provides particularly good resistance to chloride induced stress corrosion and to local occurrences of corrosion such as pitting or crevice corrosion.
- This alloy is classified in the highest class CRC V (very strong, EN 1993-1-4) for components and fasteners.
- Fasteners in 1.4529 are therefore ideal for use in indoor swimming pools and traffic tunnels.

- Slotted round nuts for hookspanners when combined with internal tab washers according to DIN 462 provide mechanical locking.
- They are easily assembled with a hook wrench (hook spanner) e.g. to DIN 1810.

Example of application / Assembly state

- ISO metric hot dip galvanized threaded rods are manufactured with thread tolerance class 6az (undersize) before coating.
- After galvanizing they will fit into standard nuts and threaded holes with thread tolerance class 6H.

20132 Threaded rod length 1 meter / Draadstang lengte 1 meter / Tige filetée longueur 1 mètre G04A

Threaded rod MF

Draadstang MF / Tige filetée MF

4

DIN 976-1A
NF ≈E25-136

One end of these threaded rods is color coded as an alternative for marking and to improve identifiability.

Colour code of threaded rods

Property class	Material	Colour
4.8	Plain steel and zinc plated	None
4.8	ISO metric hot dip galvanized	Light blue
4.8	Oversized hot dip galvanized	Orange
8.8	Plain steel and zinc plated	Traffic yellow
8.8	ISO metric hot dip galvanized	Steel grey
8.8	Oversized hot dip galvanized	Purple
10.9	Plain steel	Oyster white
12.9	Plain steel	Traffic black
A2	Stainless steel A2	Traffic green
A4	Stainless steel A4	Flame red

Special features PERMAGLAS ME 771:

- Glass-fiber reinforced epoxy
- Temperature resistant -270°C up to +155°C
- Light weight (density 1,9-2,0 g/cm³)
- Corrosion resistant, highly UV- and weather resistant
- Resistant to aggressive chemicals and gases
- Provides electrical and thermal insulation
- Non-magnetic
- Better mechanical properties than e.g. Polyamide

56050 Threaded rod Permaglas / Draadstang Permaglas / Tige filetée permaglas

Special features PERMAGLAS ME 730:

- Glass-fiber reinforced epoxy
- Temperature resistant -270°C up to +155°C
- Light weight (density 1,85 g/cm³)
- Corrosion resistant, highly UV- and weather resistant
- Resistant to aggressive chemicals and gases
- Provides electrical and thermal insulation
- Non-magnetic
- Better mechanical properties than e.g. Polyamide

- Oversized hot dip galvanized threaded rods are manufactured with standard thread tolerance class 2A before coating.
- After galvanizing they will therefore NOT fit into standard nuts or threaded holes with thread tolerance class 2B. Suitable nuts must be tapped oversized as per ASTM A563.

Threaded rod for shuttering, knuckle thread

Bekistingsdraadstang ronde schroefdraad / Tige de coffrage

4

Special features of threaded rods for shuttering:

- Concrete may be poured without protecting the rods using plastic sleeves or similar.
- After starching of the concrete the threaded rod can be easily loosened by hammering and unscrewing.
- Concrete does not adhere well on the threaded profile, therefore cleaning of the rods is not necessary and the rods can be re-used.
- The mortar to fill up the hole afterwards attaches very well in the counter-profile of the thread in the concrete.
